**(57) Abstract:** A process for the preparation of Mancozeb suspension concentrate having low particle size, low viscosity and high suspensibility by employing Mancozeb in a powder form comprising the steps of;

- a) Mixing of water and additives in a high shear mixer along with Mancozeb powder to get homogenous premix;
- b) Wet milling of the premix to get the intermediate slurry;
- c) Blending of the slurry with suspending and antitacking agents to get the formulation.
